

Exhibit G: Public Works, Parks, Gates, Equipment, Utilities, and Lake Management

Prepared for: Memorandum to the Village Board of Tuxedo Park

Evidence standard

This exhibit distinguishes public-record support from David C. McFadden's firsthand statements. An attributed firsthand statement is included as such and is not presented as an independently audited figure.

Accomplishment register

Project or measure	Description	Evidence basis
Group mailbox stands	DPW built standardized group mailbox stands in-house, including a Continental Road installation and site landscaping	Village reports and purchase records
Village-owned traffic triangles	Leftover granite blocks from the Wee-Wah Dam project were repurposed for repairs to Village-owned traffic triangles	McFadden firsthand statement; no avoided-cost amount stated
Multi-skilled DPW staffing	Administration recruited workers with complementary carpentry, stone-masonry, plumbing, electrical, mechanical, and general-construction skills and used qualified staff for appropriate in-house work	McFadden firsthand statement; monthly Village reports corroborate varied in-house work
Equipment and supply inventory	Administration inventoried DPW and Police vehicles, equipment, and supplies and used the baseline to guide current and future purchases	McFadden firsthand statement
Surplus-equipment auction	Unusable or surplus DPW equipment was offered through Auctions International; \$8,545 was received from 10 of 11 items by April 2022	Official Village surplus list and Construction Report
Use of auction proceeds	Sale proceeds were reused for needed DPW and Police equipment purchases	McFadden firsthand statement
Wee-Wah Park	Administration improved the beach and shoreline, trees and landscaping, grills, picnic tables, dog-waste facilities, storage, and welcome or security facilities	Village reports, financial records, and McFadden firsthand statement
Village identity signs	Added signs for the Front Gate, Village Office, and Wee-Wah Park and Beach Club; McFadden designed the signs and DPW assisted with installation	Village posting and ledger entries; design and location details attributed to McFadden
SafePassage gate access	Implemented automatic gate access using license-plate recognition for registered users	Village implementation record
Replacement Main Gate traffic booth	Replaced the booth with protective construction, security glazing, reinforced foundation work, and vehicle-impact protection	Village project records and McFadden firsthand statement
Front Gate restoration	Repainted the original iron gate, restored its lanterns, opened views to August Brook, and improved the adjacent landscape and retaining-wall area during the 2020–2023 term	Official Village gatehouse announcement
Police civilian-vehicle parking	A 2005 rule required officers' civilian vehicles to park behind the Police Station or Lodge rather than in front of the Keep, leaving the front area for police cruisers	Archived 2016 Board account describing the existing 2005 rule
Contractor use of South Gate	Contractors were permitted to exit through the South Gate to reduce the recurring Main Gate queue	McFadden firsthand statement
O&R project staging	Village property at or near the DPW facility was rented for overnight storage of trucks supporting the approximately three-year grid upgrade	McFadden firsthand statement; O&R independently documents the multi-year project
O&R vegetation coordination	Village worked with O&R on trees and branches overhanging electrical lines	McFadden firsthand statement; O&R documents trimming and danger-tree removal

Project or measure	Description	Evidence basis
Electric reliability	McFadden observed a major decrease in blackouts during his administration following the grid work and vegetation coordination	Expressly identified as McFadden's observation
Eurasian watermilfoil	Administration authorized and permitted ProcellaCOR treatment in all three Village lakes; Village later stated that treatment reduced EWM populations in all three	Official Village statement
Nuisance geese	Administration used goose-management measures, including egg oiling according to McFadden, to reduce goose waste	Official nuisance-geese plan and McFadden firsthand statement

Lake-management comparison

Measure	McFadden-era record	Later record	Supported conclusion
Eurasian watermilfoil control	ProcellaCOR treatment authorized and permitted in all three lakes; Village later reported reduced EWM populations	March 20, 2024 authorization for diver harvesting with a \$20,055 base price and \$3,200 per additional day	The earlier treatment has a documented Village statement of reduction; later diver pricing is documented
Comparative effectiveness	McFadden states the chemical treatment was inexpensive and effective compared with later diving	Later outcome report was not part of the record used for this exhibit	Comparative judgment remains expressly McFadden's observation
Nuisance-geese management	Management plan documented; McFadden reports a substantial reduction in goose waste	No later comparison made in this exhibit	Achievement is stated with its evidence classification
